

What are hand tied hair extensions?

A hair weft attached to your natural hair in order to create thickness and/ or length by creating a foundation of silicone beads then sewing the weft onto the beaded foundation.

How long does it take to apply?

It typically takes 1 to 1 1/2 hrs to apply.

What are the benefits of hand tied extensions?

They can add thickness and length without being heavy or bulky. Damage free, no glue, heat, or tape is used. Easy to style and maintain.

Is there maintenance involved?

Every 6-8 weeks the extensions need to be moved up which involves removing the extensions and placing new beads and then sewing the extensions back in. This can take 1 1/2 to 2 hrs.

How do I care for them?

Do not sleep on wet as it may cause matting, brush gently in between rows, do not use excessive heat, keep properly conditioned as your natural oils will not reach the extension.
